

STEVE SUHR

PROFILE

Software developer with two decades of professional experience building solutions and modernizing legacy systems into maintainable, extensible software. Backend-focused with full stack and cloud capability. Respected leader who has coached junior developers along their own journeys.

SKILLS

C#

.NET 8, .NET Core, .NET Framework, Web API, ASP.NET, MVC, SignalR, WCF, Web Forms, Visual Studio, IIS

SQL

MSSQL, TSQL, Stored Procedures, Views, Query Profiling, SSIS, PostgreSQL, Oracle, Management Studio

Front End

HTML, CSS, SASS, JavaScript, jQuery, React

Azure Cloud

Functions, App Services, VMs, Queues, Blob Storage, Service Bus, Key Vault

AWS Cloud

EC2, ECS, Lambda, S3, SQS, Kubernetes, Kibana, Datadog

API

REST and SOAP APIs, OAuth Client Credentials, Autho

CI/CD

Azure DevOps, Team Foundation Server, Git, Gitlab, Github, Argo CD, Kubernetes

TDD

Dependency Injection, Unit Testing, Moq, XUnit, Fluent Assertions, Cypress

EXPERIENCE

Barrett Jackson, Scottsdale, AZ — Senior .NET Developer

JULY 2024 - PRESENT

Lead developer of AutoHunter.com which hosts live auctions of vehicles listed by individuals and imported by dealers.

- Used Azure queues and functions to add new features and migrate existing processes.
- Used experience in C# to navigate large .NET Framework MVC legacy code and develop new .net 8 code. Introduced DI and unit testing.
- Implemented a back plane with Azure Service Bus to scale out an application that used SignalR.
- Led all aspects of development and trained another team member in C# coding.

Skills Used:

- **C#** .NET 8, .NET Framework, MVC, SignalR, Visual Studio
- **SQL** MSSQL, TSQL, Stored Procedures, Views
- **Front End** HTML, CSS, SASS, JavaScript, jQuery, React
- **Azure** Functions, App Services, VMs, Queues, Blob Storage, Service Bus, Key Vault
- **CI/CD** Azure DevOps, Git
- **TDD** Dependency Injection, Unit Testing, Moq, XUnit, Fluent Assertions

Tivity Health, Chandler, AZ — Senior Full Stack .NET Developer

JULY 2018 - JANUARY 2024

Created and enhanced tools that manage a network of 10,000+ gyms across the US. This network provides free gym memberships and classes to seniors.

- Maintained web applications for gym owners and Tivity business users to manage contracts, report gym visits, and check eligibility.
- Created a near real time gym visit collection process that utilized a third party vendor API.
- Helped migrate on-premises infrastructure to AWS by migrating code to .NET 6 and configuring infrastructure with Kubernetes, Pulumi, and Argo CD.
- Created a product that searches and books yoga and other studio classes in the Mindbody network. Involved integrating with both Mindbody and JP Morgan Chase APIs.

Skills Used:

- **C#** .NET 6, .NET Core, .NET Framework, Web API, MVC, WCF, Visual Studio, IIS
- **SQL** MSSQL, TSQL, Stored Procedures, Views, SSIS, PostgreSQL
- **Front End** HTML, CSS, JavaScript, jQuery, React
- **Azure** Nomad, Consul, Vault, Kibana
- **AWS** ECS, S3, Pulumi, Argo CD, Datadog
- **API** REST APIs, OAuth, Autho
- **TDD** Dependency Injection, Unit Testing, Moq, Fluent Assertions, Cypress

Isagenix International, Gilbert, AZ — .NET Developer

JANUARY 2017 - JUNE 2018

Worked on the associate back office purchasing portal which sells health and nutrition products to sixteen different countries.

- Implemented customizations of the purchasing portal for the legal, tax, and marketing teams.
- Worked with payment processor and fraud detection APIs.
- Updated and added unit tests to verify changes made.

Skills Used:

- **C#** .NET Framework, ASP.NET, MVC, WCF, Web Forms, Visual Studio, IIS
- **SQL** MSSQL, TSQL, Management Studio
- **Front End** HTML, CSS, JavaScript, jQuery, Knockout
- **API** SOAP APIs
- **TDD** Dependency Injection, Unit tests

PrizeLogic LLC, Scottsdale, AZ — .NET Developer

NOVEMBER 2015 - DECEMBER 2016

Worked to build promotional websites for big brands as a back end developer.

- Built the back end for promotional websites that hosted large well known sweepstakes.
- Enforced entry/win limits and other business logic legally required by the Official Rules of the promotion
- Architected solutions that could withstand attacks from scammers and large spikes in traffic volume.
- Integrated with APIs both social (Facebook, Instagram, Twitter) and CRM related (Epsilon custom APIs)

Skills Used:

- **C#** .NET Framework, MVC, ASP.NET, Visual Studio
- **SQL** MSSQL, TSQL, Query Profiling
- **API** REST APIs, SOAP APIs, OAuth 2.0
- SVN, TortoiseSVN, Anko plugin for Visual Studio
- **TDD** Dependency Injection

Edupoint Inc, Mesa, AZ — Software Developer II

DECEMBER 2013 - OCTOBER 2015

Worked on the Product Improvement and State Reporting teams for the Synergy Student Information System (SIS) product.

- Enhanced transcripts, automated truancy letters, and other school administration features built on a custom object persistence framework.
- Trained new employees on Edupoint specific frameworks and trained interns in C#/MSSQL debugging techniques.
- Quickly turned around critical issues in federally mandated time sensitive reports

Skills Used:

- **C#**, .NET Framework, ASP.NET, Visual Studio, IIS
- **SQL** MSSQL, TSQL, Management Studio, SQL Server Profiler
- Team Foundation Server, Visual SourceSafe
- Active Reports
- LINQ and LINQPad application

SpyFu Inc, Scottsdale, AZ — Senior Founding Member

JUNE 2006 - NOVEMBER 2013

Built SpyFu.com from the ground up. SpyFu is a competitive intelligence tool for search engine marketers specializing in Google AdWord recommendations.

- Created and maintained SpyFu's custom data collection of advertiser rankings and metrics.
- Implemented dynamically generated reports built on large datasets that could be white labeled and customized.
- Built the SpyFu purchase pipeline including secure API calls to a payment processor and tracking metrics.
- Created a chrome extension to automate logins and collect metrics.

Skills Used:

- **C#** .NET Framework, MVC, ASP.NET, Web Forms, Visual Studio, IIS
- **SQL** MSSQL, TSQL, Query Profiling, SSIS, Management Studio
- **Front End** HTML, CSS, SASS, JavaScript, jQuery
- **AWS** EC2, S3, SQS
- **API** REST and SOAP APIs
- **CI/CD** Git, SourceVault, Visual SourceSafe
- **TDD** Unit Tests, NUnit

EDUCATION

Virginia Polytechnic Institute and State University, Blacksburg, VA — BS, Computer Engineering

AUGUST 2002 - JUNE 2006

Minored in Computer Science and Mathematics. Participated in undergraduate research with e-textiles/wearable embedded systems, AES encryption timing attacks, and feedback driven e-commerce research.
